SUMMARY

Recent Computer Science graduate specializing in scalable cloud infrastructure, AI integrations, and high-performance interactive systems. Proven track record in leading multidisciplinary agile teams, delivering award-winning technical solutions (StartSmart Top 40, MCIT 1st Place), and architecting fault-tolerant environments aligned with Saudi Vision 2030.

Education

King Abdulaziz University

Bachelor of Science in Computer Science. GPA: 4.36 / 5.00

Jeddah, KSA

June 2026

Experience

Petrolube Oil Company (Petromin)

KSA

Jeddah,

Innovation & Transformation Trainee

Jun 2025 – Aug 2025

- Utilized Advanced Prompt Engineering and AI-powered tools to automate internal processes, accelerating system prototyping capabilities.
- Designed user-centered UI/UX prototypes and interactive systems within modern corporate agile workflows.

King Abdulaziz University Library

KSA

Jeddah,

Technical Support IT Intern

Jan 2025 – Sep 2025

- Maintained seamless IT operations, delivering proactive technical support and system optimization for institutional databases.

SELECTED PROJECTS & ARCHITECTURE

GreenVision | AI-Powered Environmental Monitoring System (StartSmart Saudi Top 40)

Sept 2025 – Jun 2026

- Architecture:** Engineered a robust asynchronous RESTful API using Python and FastAPI to process autonomous drone imagery for invasive plant detection.
- Cloud & AI:** Configured a secure cloud infrastructure via Supabase (PostgreSQL/RLS) and integrated multimodal AI (Gemini 2.0) with an on-the-fly image compression pipeline to minimize bandwidth costs.

Mirrors of Time | Interactive VR Heritage System (1st Place - MCIT Game by CODE)

Early 2026 – Present

- Engineering:** Architected core gameplay loops, stealth-based evasion systems, and complex physical mechanics using Unity and C#.
- Leadership:** Managed a multidisciplinary team via Trello and maintained version control via GitHub Desktop, securing official studio incubation.

Enterprise Cloud & Serverless Infrastructure

Oct 2025

- AWS:** Designed fault-tolerant deployments utilizing secured VPCs, EC2 instances, and managed RDS databases.
- Serverless:** Engineered an automated data pipeline using Cloudflare Workers and Appwrite to securely archive academic projects (Mufakkirat Saudiya).

TECHNICAL & CONSULTING SKILLS

Cloud & DevOps: AWS (EC2, RDS, Lambda, VPC, S3), Cloudflare (Workers, Pages), Vercel, Render, Docker, CI/CD (GitHub Actions).

Backend & Databases: Python (FastAPI, Flask), PostgreSQL (Supabase), MySQL (TiDB), Appwrite, RESTful APIs.

AI Integrations: Google Gemini 2.0 Flash Vision, OpenAI Whisper, Advanced Prompt Engineering.

Systems & Interactive: Unity 3D, C#, Object-Oriented Programming (OOP), System Architecture, JavaScript, React.
